

Just the FACTS...

...about the expert staff at **R & D Industries, Inc.**

FACT: Members of our staff have collaborated with many of today's industry leaders in sound and acoustics to help define the correlation between what we hear and what we scientifically measure.

FACT: Our staff members have contributed to the universal understanding of sound reinforcement intelligibility by instructing in numerous conferences for Synergetic Audio Concepts (Syn-Aud-Con), the nation's premier real-world audio and acoustics education group.

FACT: Two of the six people in Iowa who have been certified in Low Voltage Audio Systems by the National Institute for Certification of Engineering Technologies (NICET) practice as system engineers at R & D Industries.

FACT: The founders of R & D Industries developed and maintained professional relationships with some of the premier minds in sound and acoustics, including Dr. Wolfgang Ahnert, John Prohs, and Don and Carolyn Davis.

FACT: R & D Industries' staff was one of the first to utilize computer-aided modeling to predict the acoustics of an enclosed space before that space even exists. The staff was also one of the first to regularly use TEF, the industry's premier computer-based testing system.

FACT: Our acoustics experts were twice selected to lecture members of the American Institute of Architects, Iowa Chapter. The lecture provided architects with insight into how choices they make as architects impact the functionality of their clients' spaces.

FACT: The staff of consultants and system engineers at R & D Industries has provided acoustical and sound reinforcement services for hundreds of clients throughout the Midwest.
