

## Key Objectives:

- Redesign and Engineer an up to date Audio/Visual system
- Aesthetically pleasing installation.
- Ease of use. "Turn Key" operation.
- Current and future solutions in mind.

Bethan Lutheran Church Sanctuary

## System Overview

With a desire to enhance church worship and activities, Bethany turned to RDI for a state-of-the-art Audio/Visual system. Through careful design and engineering, RDI worked extensively in every phase of the project with the client to provide a design that accomplished current and future needs. The dated sanctuary system was replaced with new infrastructure and endpoints throughout. Through modelling and analysis, a column line array loudspeaker system was added with front and balcony fill loudspeakers. Video capture is provided by three high definition robotic cameras. The system is controlled by custom designed touch panels for automation/ease of use. Bethany Lutheran now offers quality sound and technology for all in attendance!

## Key System Features

- Professionally designed and engineered sound reinforcement.
- Custom design, which was implemented for the clients needs and future wants.
- State-of-the-art automated control system and end-user devices.
- Remote robotic high definition video cameras, with touch panel for ease of use.
- Custom designed end-user control booth and room layouts for pleasing aesthetics.
- Wireless and wired custom control panel interfaces designed with the client for ease of use.
- Full coverage sanctuary sound for service, event, and day-to-day use.

## Location

Spencer, IA

## Client

Bethany Lutheran Church

## Facility Type

House of Worship

## Solutions

New Audio, Visual, and Automated Control System.

“RDI took the time to speak with our worship leaders, get a feel for the needs of our church and the abilities of our sound and video operators, and did a detailed acoustical analysis of our space with a computer model. They went extra lengths to program a custom system that is designed to fit our needs and made everything user friendly.”
