

Key Objectives:

- Updated audio system for events.
- Great speech and audio quality.
- Aesthetically pleasing installation.
- Current and future solutions in mind.

Estherville Lincoln Central High School Hoyt Luithly Field

System Overview

The Estherville Lincoln Central School High School was in need of a new audio system for their football and track field. With the help of RDI they were able to accomplish that goal by adding 6 new main speakers and all new audio equipment to enhance the experience of any event being held at Hoyt Luithly Field. After installing the new equipment and speakers, RDI tuned the system with speech intelligibility in mind. The addition of wireless mics and external antennas allows for flexibility and clarity when speakers are on the field. From the pregame music to all the play by play action at any sporting event, Hoyt Luithly Field will always be ready on game day.

New Equipment Rack

New Speakers Mounted on Light Pole

“RDI Installed new sound systems in our elementary gym and at our football field. These two facilities have different needs for sound. RDI designed and installed a system that fit each facility and did an excellent job. Both systems are easy to use and provide good quality sound.”

-Kevin Richardson
Director of Technology

Key Objectives:

- Updated audio system for events.
- Great speech and music quality.
- Aesthetically pleasing installation.
- Current and future solutions in mind.

Estherville Lincoln Central Demoney Elementary Gymnasium

System Overview

The Demoney Elementary School in Estherville had just gone through some major additions and remodels the last few years. One of those additions was a brand new gymnasium for the school. The only thing missing was a new audio system to put the final touches on this wonderful addition. RDI designed and installed a new audio system that offered superior speech and music playback. A wall mounted controller (pictured bottom right) allows the faculty to adjust microphone and audio levels with great ease. A wireless mic was also installed to allow for an announcer to present anywhere in the gymnasium.

Key System Features

- Professionally designed and engineered sound reinforcement system.
- Custom design; which was implemented for the clients current needs and future expansion.
- Simple to run setup for any operator.
- Superior speech intelligibility and music playback.
- New wireless microphone system.
